Education

Master's in Data Science and Machine Learning
University of La Rioja · 2026 – 2028

Bachelor's in Computer Engineering
University of La Rioja · 2021 – 2025

Technical skills

Languages
TypeScript, Python, Java, Go, Rust, Bash

Testing
Playwright, Pytest

CI/CD and platform
Woodpecker CI, Jenkins, Docker, Kubernetes, k3s, FluxCD, Helm

Data
Postgres, Kafka, Grafana

AI
Claude, MCP

Languages

Spanish · native

English · intermediate

Profile

I chose Computer Engineering over Mathematics and found in it what chess had taught me: decision-making, problem solving and continuous learning.

Today I focus on continuous integration: CI/CD pipelines that automatically verify that projects work. I also research new tools to add features and improvements, as technology is moving faster than ever.

Experience

QA Engineer · Arsys Jun 2025 – present

- E2E suites with Playwright and TypeScript on a shared library (page objects, API clients) published as a package.
- Scheduled regression against production, with results published as events to Kafka.
- Shared pipelines and templates in Woodpecker CI; Jenkins jobs and Docker test environments.
- QA platform on k3s with GitOps (FluxCD and Helm): from merge to deployment in about 90 s.
- Grafana dashboards showing the state of the tests.
- AI-assisted validators and proofs of concept for new tools.
- Automating manual processes from browser recordings, with Claude and MCP.

Final degree project · Arsys Feb 2025 – May 2025

- Development of a frontend for the QA team's test suite.
- Technical documentation for the project.

Business Systems QA Tester · Internship · Arsys Sep 2024 – Dec 2024

- Automated and manual testing of business systems.
- Spotting improvements in quality processes and reporting results to QA and development.
- Planning meetings, retrospectives and international coordination.
